

THE **FACTS** BEHIND OUR GOOD WOOD POSTS

- Manufactured from quality, REDWOOD, homegrown FSC certified timbers.
- Timber is dried to ensure appropriate moisture content, ready for pressure treatment.
- Pressure preservative pre-treated with Tanalith® E – the leading wood preservative for ground contact applications – to meet Use Class 4 (ground contact) requirements and provide a 15 year guarantee* against decay and insect attack.
- Choice of green (Tanalised®) or brown (Tanatone®) colour treatment options.
- Wide range of sizes available.
- Choice of machined finishes.
- All controlled and quality checked within our own Taylormade production processes.

* Full details of our guarantee are shown overleaf.

Our **GOOD WOOD FENCE POST** gives you the perfect component to build the rest of your fencing range around. Within the **TAYLORMADE GOOD WOOD** range we also offer an extensive choice of **fencing rails and boards**, as well as **battens** and **featheredge** for your own panel manufacture.

- Produced from homegrown, sustainable FSC certified timbers.
- Manufactured using the very latest milling and processing equipment.
- Preservative pre-treated with our **15 YEAR GUARANTEE*** against decay and insect attack.
- Delivered and supplied in a fast and friendly manner.
- A complete service to make you and your fencing timbers feel good.

...and just part of the

WHEN ONLY THE BEST WILL DO!

QUALITY TIMBER PROTECTION

When it comes to preservative pressure treated timber, you need to have assured confidence in its long-term performance and durability.

TANALISED® E pressure treated timber is unique. It has been treated with TANALITH® E wood preservative – an exceptional and proven preservative, which provides unrivalled protection for your timbers.

More than 15 years of successful commercial use, in addition to extensive independent field trials, underpin the performance of TANALISED® E pressure treated timber.

Add in the choice of TANATONE® - a brown treatment option proven in terms of colour strike and longevity - and you have a winning combination for all of your fencing needs.

15 YEAR GUARANTEE

The Tanalised®/Tanatone® pressure treated Good Wood Range of fencing timbers from Taylormade Timber, when used in accordance with the appropriate standards and in the relevant Use Class situation, has a 15 year guarantee against failure of the timber from fungal decay or insect attack.

The guarantee is for the cost of re-supply by Taylormade Timber, or the re-supply by Taylormade Timber (at our option), of a component that is proven to have failed as a result of fungal decay or insect attack within 15 years of supply. It does not cover the costs of removal or reinstatement of such components or consequential costs or loss due to failure of the component. Claims must be brought within two weeks of the expiry of the 15 year period, at the latest.

The term 'fungal decay' as used in the guarantee refers to wood destroying fungi that feed on and degenerate the wood cell walls. It excludes staining and mould fungi associated with the weathering of wood.

The term 'insect attack' refers to attack by wood digesting insects that destroy the timber structure.

The term 'failed' refers to damage caused by insects and/or fungi to such an extent that the component is no longer fit for purpose.

Nothing in this guarantee affects the statutory rights of consumers, or excludes or restricts the liability of Taylormade Timber for death or personal injury caused by negligence, or for fraudulent misrepresentation.

CONDITIONS

1. Only Taylormade Good Wood Fence Posts must be used in ground contact situations - Use Class 4 (BS EN 335-1). Taylormade Fence Rails, Fence Boards and Featheredge and Battens should only be used for out of ground contact situations - Use Class 3 (BS EN 335-1).
2. Should the Taylormade Good Wood pressure treated fencing timbers be cross cut, notched or bored during installation, then exposed surfaces are to be liberally brushed with Ensele® end grain wood preservative to the directions shown on the product label.
2. Fence posts must not be pointed after treatment.
3. The shortening of fence posts should be avoided, if possible, but in any event the cut end must never be used in ground contact.
4. Any Taylormade Good Wood pressure treated fencing timbers which are further processed, eg. planed, must be returned to Taylormade Timber for re-treatment.

EXCLUSIONS

1. Any Taylormade Good Wood pressure treated fencing components supplied for use outside of European markets.
2. Any Taylormade Good Wood pressure treated fencing timbers removed from their original installation and re-used at a new location.
