free fall height
570mm

Three Bar Balance

L5095 W2445
H511mm
free fall height 511mm

Low Level Timber Trails

The low level timber trail range from A E Evans provides high performance timber based play equipment predominately aimed at the trade for re-sale in the play and leisure markets.

All products are manufactured on site by our own fully trained and experienced production staff using only sustainably sourced timber of the highest quality.

Whether you choose to have your trail components manufactured from home grown softwood or radiata pine our customer focussed service team is ready to meet your exact needs to ensure reliability in both production and delivery.

With a choice of either complete trails or individual components to create your own designs, all items come complete and ready to install with clear installation instructions. All items and components meet the requirements of BS1176.

With either choice of timber species, all components are pressure treated with the leading new generation wood preservative - Tanalith® E. This advanced protection allows us to offer extensive warranties against the threat of wood decay and insect attack even in ground contact, providing a real assurance for you and your customer.
